Faux Wood Graining by European Finishes in Sarasota

European Finishes also specializes in the art of Faux Wood-Graining. Our artisans can transform ordinary drywall beams into beautiful authentic- looking wood beams. This process is achieved by using paint, stains, glazes, oils, and solvents that provide a natural and real wood look. We can also faux paint crown molding, baseboards, door and window casings, to match any existing furniture or cabinets. Where real wood beams are not possible Faux Wood-Graining is a viable alternative!
